

The following is the text of a letter that was sent to local media in Massachusetts from a Day Care Center owner in the Boston area. It speaks for itself:

*Hi,*

*I am the owner of Sandcastles Childcare, which was recently relocated to 313 East St in Hingham after an extensive renovation and restoration of one of the most historic homes in the town (allegedly one of the 5 oldest). The residence that our school now occupies was built in 1690 and was once the Black Horse Tavern.*

*A while back, I had installed an air purification system (Photox) to help eliminate allergens, odors, and airborne bacteria from some of our classrooms. After having great anecdotal success and being convinced of the system's effectiveness, I had the units installed in every classroom. I just received notice via a press release (link below) that an independent study has found that the system (now called LeVOCC) successfully and effectively eradicates the swine flu/H1N1 virus, without producing the potentially dangerous byproduct of ozone, which other systems produce.*

*<http://www.prnewswire.com/news-releases/swine-flu-h1n1-virus-destroyed-by-innovative-air-treatment-technology-63744017.html>*

*Given that I have approximately 100 children in my care, from infancy through full-day Kindergarten, the swine flu was an enormous concern. Of course, it is of great concern to the parents as well! It is such a relief that there is more we can do than enforce health policies, hand-washing, and sanitizing to minimize this threat. I would like to help get the word out to the community that this system, which is also available for home use, is available.*

*Please let me know, if you would be interested in running a story about this.*

*Thanks!*

*Sara Sullivan*

Also, the following is an anecdotal report on the LeVOCC units at the Day Care Center:

*The LeVOCC units were installed in my school several years ago to help eliminate airborne allergens and odors such as urine. We were thrilled with the immediate and noticeable improvement to the air quality. This change was especially welcomed in the diaper-changing and potty-training areas!*

*We quickly became convinced that the system was also extremely effective in preventing common childhood illnesses. At one point, I had not yet installed the units in every classroom. There were two neighboring classrooms; one with the LeVOCC unit and one without. A flu bug swept through the classroom without the unit and 14 out of the 16 children in that class came down with it. Not a single child in the neighboring classroom with the LeVOCC unit fell ill.*

*Given the threat of swine flu/H1N1, the fact that Sandcastles has the LeVOCC system has been incredibly comforting to parents. Many of them have commented that they appreciate our commitment to providing the safest and healthiest environment for their children. My teachers certainly appreciate it too.*

*Sara Sullivan, President/Owner*

*Sandcastles Childcare & Learning Center*

Sara is available to talk to reporters etc. about her experience with our air purification technology. Please feel free to use her quote. She has asked that any interested parties contact her via her cell phone (781) 248-2473.
